

SERVICE PLUG

The Service Plug is developed to plug hoses or rigid pipes to avoid oils and chemicals from contaminating the environment and to preserve costly oils and liquids inside systems during maintenance and repair. It can also be used to protect machine channels from dust and corrosion when cleaning or painting, to prevent water, paint, dust and pollution from harming system and components

IMPORTANT

- For use in non pressurized systems and vacuum systems!

MATERIAL

- The Service plug is produced in high quality oil resistant rubber

DIMENSIONS

- For channels and holes between .04" – 1.7"
- Micro: .04 - 0.4"
- Standard: .16 - .91"
- XL: .47 - 1.7"

TEMPERATURE

- -15°F +195°F

TOOLS

- No tools needed! Use your hand. Insert, push then push and twist in the same action

CUTTING

- If the plug reaches the bottom it may be cut. If you chose to cut a plug in place, make sure to leave enough material outside the hole that you easily can remove the plug
